

MUHAMMAD ARRAYAN FIKRI

Department of Software Engineering, Telkom University, Bandung, Indonesia
arrayanfikri@student.telkomuniversity.ac.id | +62 851 7225 1169

PROFESSIONAL SUMMARY

Software Engineering student with a strong technical background in Quality Assurance and UI/UX design. Experienced in executing functional and non-functional tests, managing technical documentation, and applying rigorous testing methodologies to optimize product performance. Passionate about problem-solving and delivering high-quality user experiences through structured development and testing processes.

EDUCATION

Telkom University

Bandung, Indonesia

Bachelor of Software Engineering (S1)

Expected 2027

Relevant Coursework:

Software Quality Assurance (SQA), Software Testing, Object-Oriented Programming (OOP), Database Systems, and Web/Mobile Programming.

Actively participated in TPLM (Technology for Society) initiatives to apply software engineering principles to real-world community projects.

TECHNICAL SKILLS

Quality Assurance & UX Research (Advanced): User Acceptance Testing (UAT), System Usability Scale (SUS), Bug Reporting, Wireframing, UML Documentation, User Flows.

Development & Prototyping (Intermediate): Dart (Flutter), HTML, CSS, JavaScript, Java, PHP (Laravel), Git Version Control.

PROJECT EXPERIENCE

Gestra - Sign Language Translation Application

Telkom University

UI/UX Developer

Feb 2025 – Jun 2026

- Designed and developed essential user interfaces for GESTRA, a real-time SIBI sign language translation application, specifically programming the main homepage, settings module, and a system-responsive dark mode.
- Engineered automated testing scripts and performed manual debugging to identify and resolve front-end defects, enhancing visual consistency and stabilizing UI state transitions.
- Collaborated in Agile framework to develop interface flowcharts, facilitating seamless user experience and smooth navigation between application front-end modules.

TPLM - SDN 012 Babakan Ciparay Quiz Application

Telkom University

UI/UX Designer

Nov 2025 – Apr 2026

- Designed wireframes, prototypes, and high-fidelity visuals in Figma for a school quiz application, enhancing learning experiences for students and teachers at SDN 12 Babakan Ciparay.
- Conducted User Acceptance Testing (UAT) sessions at Telkom University TULT building, validating design decisions and collecting insights to inform iterative improvements.

- Assessed application interface using System Usability Scale (SUS), securing a usability score of 84.29, indicating a high level of user satisfaction.

siPelakor - Marine Conservation Gamified App

UI/UX Designer

Telkom University

Oct 2025 – Jan 2026

- Designed wireframes and mapped user flows to optimize interface usability and accessibility.
- Integrated gamified elements to promote marine cleanliness and enhance user engagement.

LowKos - Property Management & Student Housing App

UI/UX Designer

Telkom University

Oct 2024 – Dec 2024

- Conducted comprehensive user research, synthesizing direct interviews and questionnaires into actionable user personas, Hierarchical Task Analysis (HTA), and complex system user flows.
- Designed an accessible, high-fidelity interface in Figma utilizing a custom design system focused on legibility, localized content, and cross-device responsiveness.
- Executed on-site usability testing sessions, achieving a 100% task completion rate on core navigational flows and extracting quantitative effectiveness metrics to guide iterative improvements.

LANGUAGES

Indonesian (Native Speaker); English (Fluent B2)

INTEREST

Game Mechanics & Narrative Analysis: Analyzing in-game balancing (power-scaling, skill trees) and narrative alignment archetypes in complex story-driven titles (Action-Adventure, RPGs)

Human-Computer Interaction (HCI) & Accessibility: Researching inclusive design patterns and studying how users interact with complex software interfaces and narrative-driven systems.
